Attention Terry Moffatt

Re: Letter of Reference

Dear Terry,

[Redacted] would like to thank your company for an outstanding job on the supply and installation of your chemical injection pumps in Kurdistan for our customer, Western Zagros. As this was a new venture for our company in the supply and installation of both the downhole and surface chemical injection systems we needed to work with companies like yours to ensure a successful installation and commissioning of all products.

As you were aware the conditions required for us to perform under were extreme;
Very high injection pressure, 4,500 psi
Various chemical requirements, from Ashphaltime inhibitors to scale inhibitors
Wide range of injection rates required, 60 to 230 Gal/Day
Deep wells, 4,000 meters.
Desert conditions with day temperatures exceeding 50C and blinding sand storms.

Feedback we received from our customer was extremely positive on the entire system, from our downhole equipment to your surface Gemini AC powered Stealth Injection system inclusive of pumps, motors, controllers, tanks and skids rated for desert conditions!

We look forward to continued success with the numerous other applications we have partnered on.

Sincerely

[Redacted]

President
