

Gentlemen,

Thanks for your time and expertise in the field while helping to get our Sirius systems up and going. It is very beneficial to [REDACTED] personnel and our chemical providers as well. We certainly appreciate your help as we continue to learn and better understand the systems. Your attention to detail, knowledge and timely responses to any issues or troubleshooting that we need has been top notch. The guys are always easy to get a hold of and great to work with. The Sirius skids have certainly helped us dial in our usage rates as well as cut down costs and footprints of tanks and pumps on locations. I certainly look forward to working together in the future on projects that come up where Sirius products can help us out.

Respectfully,

[REDACTED]

Sr. Chemical Specialist
