

To Whom it may concern:

 purchased 10 skids between March of 2023 and May of 2024.

The skids are working perfectly, the accuracy compared to other chemical skids is very high.

The quality of the units and the detail put into each skid is second to none.

Blair and his team's customer service and hospitality has been exceptional.

We hope the cooperation between  and Sirius Controls through our sponsor

 will continue for years to come.
