

Profitable Environmental Solutions™

SIRIUS TANKS, TOUGH CONTAINMENTS

335G Nova™ Horizontal Tank

Cost Efficient

- Reduces vacuum truck costs.
- Reduces environmental disposal costs.
- The HardTopper™ prevents over 90% of snow or rain from entering the containment. This minimizes vacuum truck requirements and drastically reduces environmental disposal costs.

Environmentally Friendly

- Reduces ground contamination.
- Prevents wildlife and livestock from drinking containment fluid.

Effective Design

- With Nova™, any accidental overflows during filling are captured in the secondary containment, preventing expensive clean ups.
- Nova™ tanks are designed for easy installation of chemical pumps, controllers, and solar equipment. Bottom fill adapters and other customizable options are available.

NEW SOLUTION!

✓ Heated Tank Packages

- Available for stainless steel IBC totes.
- Certified for Class 1 Division 2 (C1D2) hazardous location.
- Available with 120/240V AC voltage supply.

Rugged pole mounts keep solar panels in place during high winds.

Corner rear lid position for easier access.

Solar panels, battery boxes, and radio poles can be mounted directly to the tank stand.

Multiple battery boxes can be mounted or located in four different spots.

Robust containment keeps its shape in the desert heat.

Bottom fill addresses the safety issue of climbing up the tank stand to access lid.

Mesh to prevent animals and birds from drinking contaminated fluid.

Tie back to tank for sight glass vent to prevent dust and containment from entering sight glass.

Tank bolts down to sturdy engineered stand preventing tipping when the tank is low during high winds.

500G Nova™ Vertical Tank
(shown with ancillary chemical injection equipment)

SIRIUS TANK DETAILS:

Nova™ Tanks	335G Horizontal	500G Horizontal	500G Vertical
Capacity (US Gallons)	335	500	500
Overall Height	74"	93"	80"
Base Footprint	56" x 86"	106" x 60"	79" x 104"
Containment Capacity	370 gallons	600 gallons	630 gallons
Material	High-density polyethylene (HDPE) Optional Cross-linked polyethylene (XLPE)		HDPE

OTHER OFFERINGS:

- Dual wall tanks with a capacity ranging from 50 gallons up to 2,000 gallons.
- Stainless steel tanks in 500 gallons and 1,000 gallons.
- Steel tanks and skids in 500 gallons and 1,000 gallons.
- Single wall totes and tanks in various sizes.

ABOUT SIRIUS

Sirius Instrumentation and Controls Inc. (Sirius) provides a full spectrum of solar-powered chemical injection systems, AC chemical injection systems, and environmentally friendly tank systems.

The company focuses on developing products that meet the challenging environmental requirements within the oil and gas industry. Sirius' commitment to engineering has led to many innovations, keeping the company at the forefront of technology in the chemical injection and solar marketplace.
